

# LIVESTOCK FEED DIVISION

ORIGIN PROTEIN LIMITED – KENYA (OPK)

Dairy | Beef Fattening | Survival & Emergency Feeding

Trusted feed solutions for commercial farms,  
ASAL systems, NDMA & humanitarian programs  
Kenya | East Africa

# WHO WE ARE

**Origin Protein Limited – Kenya (OPK)** is a Kenyan agribusiness company focused on building reliable, scalable livestock value chains across East Africa.

The OPK Livestock Feed Division provides purpose-engineered animal nutrition designed for real operating conditions — from high-yield dairy systems to drought-prone ASAL regions.

## We serve:

- ✓ Commercial dairy and beef farms
- ✓ Feedlots and pastoral systems
- ✓ Government drought-response programs (NDMA)
- ✓ NGOs and humanitarian operations

# WHAT MAKES OPK DIFFERENT

Purpose-engineered feeds (not generic products)

- ✓ Designed for ASAL and climate-stressed environments
- ✓ Reliable quality, traceability, and consistency
- ✓ Scalable supply for commercial and emergency use

# WHAT MAKES OPK DIFFERENT

Purpose-engineered feeds (not generic products)

- ✓ Designed for ASAL and climate-stressed environments
- ✓ Reliable quality, traceability, and consistency
- ✓ Scalable supply for commercial and emergency use

## DAIRY PERFORMANCE LINE

Maximising milk yield, fertility, and herd stability

### Products

- Alfalfa (Lucerne) hay
- Boma Rhodes grass
- Napier grass (all varieties)
- Dairy Total Mixed Ration (TMR)
- High-protein dairy concentrates
- Dairy mineral premixes

### Ideal for:

Zero-grazing and commercial dairy farms

## BEEF FATTENING LINE

Accelerated weight gain and superior feed

### Products

- Premium grass hay
- Boma Rhodes & Napier grass
- Beef Finisher TMR
- High-density finishing pellets
- Oilseed cakes & meals (soybean, cottonseed, sunflower, sesame, groundnut)

### Ideal for:

Commercial feedlots and export finishing programs

## RESILIENCE & SURVIVAL LINE

Protecting livestock during droughts and emergencies

### Products

- Emergency grass hay
- Survival pellets (high-energy, low wastage)
- Silage (maize & sorghum)
- Crop residues (maize stover, wheat & rice straw)
- Mineral and salt blocks

### Ideal for:

NDMA, NGOs, ASAL and pastoral systems
